▪ *Bull Sale* ▪

SATURDAY FEBRUARY 11, 2023 AT 2PM
ANGUS | CHAROLAIS | HEREFORD | SIMMENTAL | F1 CROSSES

WELCOME FROM THE

TREFIAK FAMILY

We wish to extend the warmest welcome to our friends, neighbors, and fellow cattlemen to join us for our 29th annual bull sale at the farm. Without a doubt there is much to be grateful for in what started as a year where mother nature had shown us no signs of backing down from the massive and widespread drought. We were fortunate to have timely rains for relief, and think often of those who did not.

Raising cattle on the prairies has always been about perseverance and those that earn even a portion of the livelihoods from this endeavor are easily the hardest working people in society. They are the backbone of their communities, the pillar of their extended families, and some of the most creative and multi-talented people on the planet.

When it comes to the meat business, we believe that Canadian Beef producers have an incredible story to tell. The nutrition that beef offers the consumer and their families, the versatility of a cows diet to use waste feed that isn't grade appropriate for humans, the amount of carbon captured in our grasslands, and the other environmental benefits of grazing; it is one of the best food stories in the world.

We believe the long-term value of our customers product will rise substantially. It is encouraging to see beef market strengthening in the short term. Year-end interest in feeder cattle resulted in annual highs being set for many classes.

At Agribition this year we had spoken with several Australian producers. They are seeing unprecedented prices for their commercial stock. This is of course following a 4 year drought that saw herds shrink drastically but those that persevered are now being rewarded with the best returns of their careers. Weaned steer calves are bringing \$3,200CA and cull cows are at \$4,100CA. Many analysts believe that when we see the drought break in the Southern Canadian prairies and throughout the cattle producing states in the US there will be a significant restocking take place that will see values climb to levels we have never seen before. Perseverance is an action that requires discipline, belief and a long-term vision.

On Feb 11th we will be offering a set of cattle that we hope garner your respect. They are real cattle; they are not pampered and have been raised through a drought. They are a testament to our females that they indeed are able to go out to work and raise a calf in tough conditions. Our breeding goals have been at the core of this operation for a couple of decades and are pretty simple. Make the cows so they can do it on their own, are sound, consistently raise a quality calf, and do it efficiently. The bulls hopefully strike you as the kind that are going to cover cows well, add some middle and muscle shape, improve foot quality in your replacements and add some pounds to the calves. If you can evaluate them in person, we absolutely encourage you to do so as we believe the quality of the animals as well as the foot structure across the entire offering is excellent. If you are unable to get here, do not hesitate to call. We will be as honest and forthright in sharing our evaluation of each animal as we would be if we were buying for ourselves. We offer a sight unseen guarantee should you work with one of us to help select an animal for your operation's needs.

Thank you for your interest in our program and please let us know how we can be of assistance in being a trusted source of genetics for your herd.

CALVING EASE

We have spent a lot of years selecting for calving ease, and selecting for genetics that allow for calving ease without sacrificing performance. Many customers use our bulls on their first calvers. When we started the 'Back to the Basics' Bull Sale we made a system to help you when choosing your next heifer bull. When we grade the bulls, we are fairly conservative. Some of our customers with larger framed cattle successfully 'level up' as they get to know our program. Mick has always said, he won't sell a bull he wouldn't calve out himself. The system is based on the following...

BW in pounds

Consistency of sire's BW

Consistency of dam's BW

Consistency of calving ease of both sire & dam

★ Recommended for cows only

★★ Recommended for cows or larger framed heifers

★★★ Recommended for heifers

Always keep in mind 50% of your calf's BW relates back to his dam.

VOLUME DISCOUNTS

3 bulls will get you 3%

4 bulls will get you 4%

5 bulls will get you 5%

The discount will only apply to bulls paid for within 30 days of Invoice Sale Day.

CATTLE REFERRAL PROGRAM

80% of our customers are repeat customers. We believe that there is no higher compliment than a customer referral. If you let us know that you have referred someone to our program, and they make a purchase we will give a 5% referral payment on their first year purchases. Referral names must be provided before the sale. Referral remuneration will be provided early spring after the lots are settled.

The MJT TEAM

They are not staff, they are family. We know there is no way we could do this without them. We have been blessed the past few years with amazing help on both the cattle and crop aspects of our operation, as well as our 'crew' that comes together for shows and the Bull Sale.

Pierre & Ilette COETZER

Pierre and Ilette immigrated to Canada from South Africa 2 years ago. Their journey here has been one of courage and determination and we see that extend to their efforts here every day. Ilette is a terrific stockperson with a great eye that she is putting to use here with photography as well as training horses and dogs. Aside from being Kurts right-hand man through seeding and fall, Pierre has become the resident handy-man and has built many miles of fence, added many lifts of windbreak boards, welded panels, fixed vehicles and pretty well figures just about anything out that comes his way. He has a true appreciation of the livestock, both cattle and horse, as is evident in his dedication to their needs. We are so fortunate to have them here. On sale day, please introduce yourselves to a wonderful couple that have become an integral part of our operation.

Matthew, Ryan & Casey TREFIAK

Matthew is finishing up his last year of Animal Sciences at University of Saskatchewan. Even through his 4 year degree, he has remained very involved in our operation. His memory for genetics and remembering cattle he has seen leads to many late night talks about breeding decisions. We are excited to see what the next stage of life has in store for him. His 'bigger-little brother' Ryan, is in Grade 9. He has a passion for all things with an engine, and is quickly becoming his Dads right hand man in the shop. We are very fortunate Darryl Atkinson has been spending some time out here as well and Ryan is learning some small engines from him. Casey, at 11, keeps us on our toes. He has a love for all animals, big or small, and a knack for picking out the good ones. His female projects have become some of the ranches top, providing us with a herdsire in the Angus, as well as a donor cow in the Hereford. Together, the boys are a great compliment to each other and our operation.

SIGHT UNSEEN PURCHASES

If you are unable to attend the sale and wish representation, please call Mick or any of the above sales staff and we will gladly assist you. For the sight unseen purchases we guarantee satisfaction upon delivery.

DELIVERY

Pick up your bull before March 1, 2023 and receive \$150 off each bull. If you leave your bull at MJT please ensure that your bull is insured. We will deliver the bulls to central points in Western Canada in March. Transport of bulls not taken on scheduled delivery runs will be the buyer's responsibility. For bulls headed to the Eastern provinces the transport cost will be the responsibility of the buyer. We will feed bulls a high roughage ration at no cost until April 1st, 2023. After that date you will be charged at a cost of \$250 per month.

USA DELIVERY

MJT will assist in arrangements for the cattle to be shipped to wherever you are in the US, at the buyer's cost. All bulls sold to the USA will be charged an additional \$250/bull to cover export testing fees. HS Knills can then look after brokerage and delivery at the purchasers expense.

PAYMENT OPTIONS

MJT's payment plan is 1/2 down on sale day and a post dated cheque for June 1, 2023. Please call Mick or Kurt prior to the sale if you would like to make alternate payment arrangements. Interest will be charged at a rate of 2% per month overdue accounts. The right of property shall not pass until settlement is made in full.

VIDEO AUCTION

View the catalog and videos of ALL animals online at: www.mjt.ca • www.dlms.ca • cattlevids.ca. This will be a video sale with no animals entering the ring. All of the sale cattle will be available for viewing prior to the sale, at the sale location. Real Time Bidding will be available via the internet for our sale. Live audio and video allow you to bid on the animals as if you were present at the sale.

RIGHT TO SEMEN

MJT reserves the right to collect semen at MJT's expense and the buyer's convenience. Any semen collected will be for MJT Cattle Company's in herd use only, unless specified in the terms of sale of a lot.

HOOF TRIMMING

No feet have been trimmed on any sale bulls.

BULL WARRANTY

All bulls are guaranteed breeders. All bulls are semen tested and vet inspected, and under a full herd health program. The Standard Canadian Hereford and Canadian Angus Association guarantee applies, as well as our 100% Customer Satisfaction Guarantee. We do not warranty against injury or illness after the sale, and encourage the use of insurance for that purpose. MJT will have replacement bulls on hand to cover your breeding season should you have any issue with your bull. Under no circumstances shall MJT be responsible for more than the purchase price of the said animal.

PURCHASER'S RISK

Each animal becomes the risk of the purchaser as soon as sold. In an effort to protect the buyer's interests, we strongly recommend insuring the bulls. There are many insurance options available, including a 6 month plan to get them through their first breeding season.

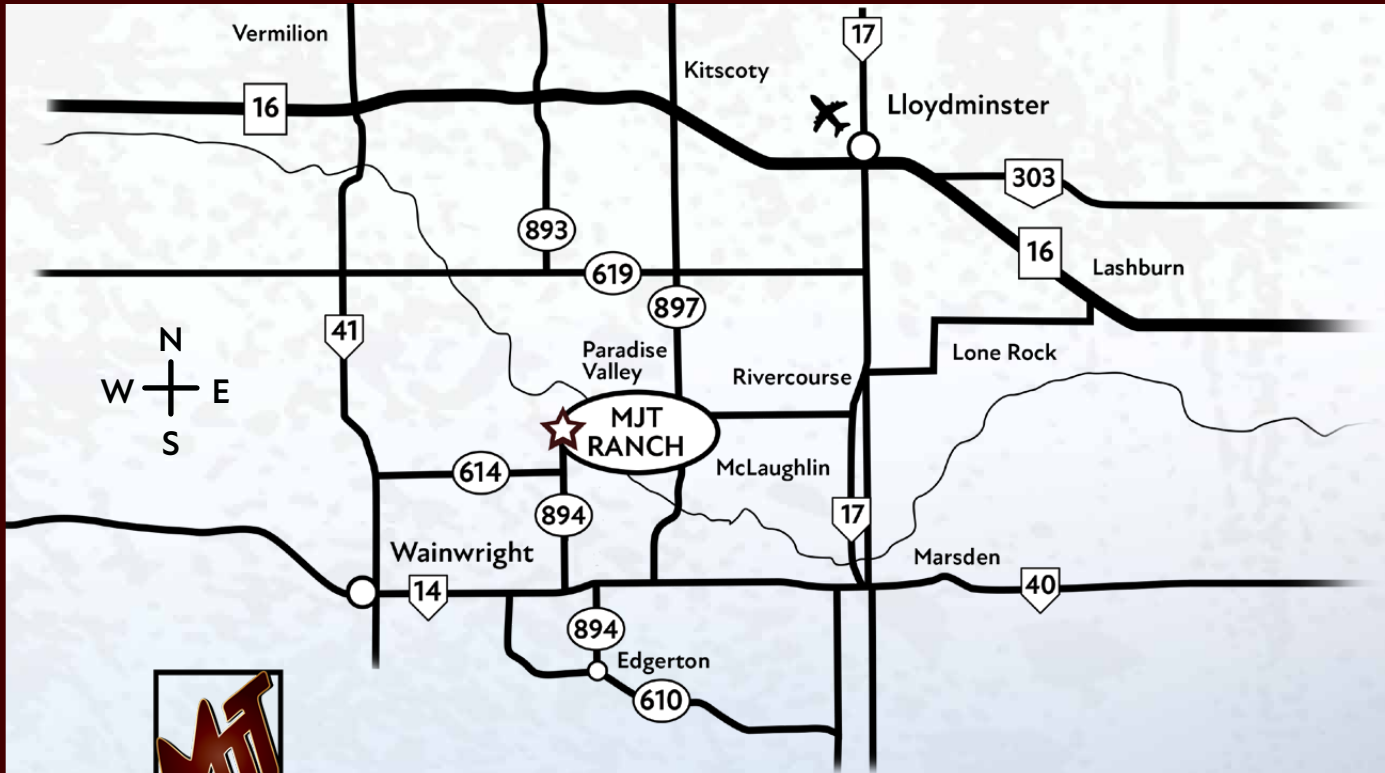

ANNOUNCEMENTS

From the auction block take precedence over what is printed in the catalog.

LIABILITY

The owners, their employees, sales staff, and representatives accept no responsibility for accidents or illnesses that may occur. Persons who attend do so at their own risk.

ABOUT OUR PROGRAM

*O*n years like this when feed is expensive, more than ever we recognize the importance of knowing there is a positive return for every dollar spent. At MJT we make every effort to ensure that there is value in your bull buying dollar, be it through our bull development program which ensures the most longevity possible, or our consistent emphasis on sensible birth weights to ensure live calves, minimal labour and high breed back percentages.

Our cattle are raised with the basics in mind with a primary focus on the needs of the commercial cattleman. Basics are what have made the Hereford and Angus breeds attractive for generations. We feel our commitment to this should help you, the rancher, produce predictable and profitable cattle using MJT genetics. We feel that having kept the basics of the cattle business at the forefront of our program is what has built both our herd and reputation. We won't compromise our principals to chase trends or for short term gain in our own pockets. We believe the most economically important traits for the cow/calf producer are still all about the fundamentals... fertility, longevity, structure, soundness and fleshing ability.

MJT isn't in this for the short haul. We have been in the "Bull Business" for four generations and this is our 29th sale at home. The philosophy has evolved over the years and we feel that the cattle are continuing to improve and are now more consistent than ever. We believe good cattle can sell themselves and we try to offer a good selection of bulls that are affordable to the needs and budget of every rancher. We run the cow herd and the bulls like a commercial outfit, testing the do-ability, winter hardiness, fertility, udder quality and longevity under real world conditions. We know our cows can wean a respectable calf

crop under almost any conditions. We strive for low input management, and our cow herd has proven it can graze nearly year round. Usually the mature Spring calving cow herd is fed mechanically for only a few weeks at calving.

MJT bulls are developed gently with their futures in mind. We expect that the bull you buy looks better on sale day than in the photo in the catalog and that he will look better the day we deliver him than the day you bought him. We just see this as normal development and will not overfeed to get them fat for the sale. We want you to be able to see what each animal has to offer under his hide, so you can pick the best fit for your cow herd. Gradual development in large pastures and big pen sizes ensures mobility, athleticism, and skeletal strength. All bulls are coming Two Year Olds; bulls that can cover more ground, breed more cows and maintain their stature better than a yearling bull.

We consciously make low use of AI breeding. Selecting a new herd bull is an intense process. We make many miles and believe that the homework on the dam, the related offspring and the actual bull himself are critical. As we investigate and analyze each new breeding piece that we add we also find ourselves more and more looking back at our own yearling pen and cowherd to move our program forward. For 29 years we have selected for consistent birthweights, and focused on soundness and foot structure. We truly believe the females are the pillars of a herd, and our main focus is always building better females. Moving our main group to late spring calving has pushed us even further in our focus on udder quality.

"WE DON'T RAISE SHOW CATTLE, WE SHOW CATTLE WE RAISE."

So why not just AI? When we buy a live bull and walk him with our cows we get to see all the other traits that don't show up on a photo or a stat sheet. This allows us to be the first to know if any problems arise and allows us to cull accordingly. We hear much concern with foot and leg structure in today's cattle. As far as we can tell, the surest way to verify long term structure and breeding soundness is to walk our dams and sires and be very critical of anything that might develop. As a result, 0% of MJT sale bulls have had their feet trimmed. On sale day the pens will be nicely bedded but we always leave some open ground so that you can assess our emphasis on foot quality for yourself.

We don't raise show cattle, we show cattle we raise. We have often debated about the merits of showing cattle. We worry that there are times in the industry where it becomes tempting to compromise on the fundamentals in favor of competition. However, there are also many benefits it affords. First and foremost, it helps develop our kids. The learning and opportunities that our industry provides agricultural youth in the show environment is second to none. The relationships that the kids make will last far longer than any ribbons they win. We have discovered that the enthusiasm of the younger

generations can take you further than you ever thought possible. Secondly, for our own development. When we get to the shows, it's a community unlike any other....graced with so many competitive yet thoughtful, caring, strong, fun and hardworking people. The exchange of ideas about what works and what doesn't can't help but make everyone involved a better stockman. Thirdly, it allows us a great opportunity to assess multiple genetics in an efficient manner. Kurt and Mick spend a lot of time through the barns looking for both positive and negative patterns in progeny, to assist us with our own genetic selection. Last, but not least, the cattle we show are cattle from our program and getting them in show condition allows us to demonstrate the results our customers can expect from our genetics when fed on a higher plane of nutrition. It reinforces our confidence that our genetics have enough muscle, depth of body and quality to remain relevant in today's cattle industry.

We hear from many customers, that show cattle don't work for them. We have made a commitment to showcase the genetics we raise for our commercial buyers, and will not compromise on our fundamentals. MJT cattle are sold with 100% guarantee and we strive to be #1 on service. We know sometimes things go wrong with bulls and if you have trouble we want to be the first to know.

NEW AT MJT THE CHAROLAIS HERD

*I*n a very rancher kind of mid-life crisis way, on the year of 'Official Retirement' according to government guidelines, Mick decided that having white cows on the place and expanding the herd was the next step we needed to take a closer look at. Sometimes in life a good thing just kind of falls together and in this case that is exactly what happened. What started as a chat about the strengths of the Charolais breed and from helping our great friends and neighbors Allan and Jackie Chesterman with their Charolais influenced commercial herd evolved into a discussion whether we should be raising them here at MJT. Ultimately, it was discussed and agreed on by the entire team, and what a decision it has turned out to be! Shortly after the bull sale in 2021 we started looking around and learned that Brent and Tyler Fisher would be open to us to looking at the herd and what we saw was impressive. This was a set of cows that fit perfectly with our philosophy on management, and we quickly came to an agreement that saw us start our new venture

with 50 cows and calves at side. The bulls in this year's sale were bred by Brent and Tyler and were born on their operation at Irma. It doesn't take a rocket scientist to figure out that the bulls on offer are a very high-quality set. Good footed, good temperament, big, stout and correct bulls that fit with what our vision of the Charolais breed is in terms of added growth and carcass size. Our plan is to copy the Hereford and Angus development programs where we will offer April/May born long yearling bulls that are summered on grass to build extra bone density and skeletal strength and be capable of reliably breeding more cows which ultimately should provide better bull buying value. You will notice that the bulls are easy to handle, we don't ever want to hear about someone's loved one being hurt by a bull and certainly not one of ours so some extra time has been spent to put a nice handle on their temperaments. We are also excited to continue our relationship with the Fischers in inviting them to offer a great group of yearlings to improve the selection of Char bulls on offer and look forward to building from a humble beginning of 25 lots to something that eventually services a growing market for the benefits that the Char cross cattle bring at the sale barns.

PVF KING ARTHUR 1D
 PVF LITTLE BLUEGRASS 717E

DAM: **PVF BOBBY JO 912G**

PVF BIG STIEVE 10E
 PVF MISS DARLA 525C

This bull is out of a first calver who's really nice and has done an exceptional job to raise this thick unit of a bull. Out of a home raised bull from Fischer's that goes back to Ledger. Unfortunately Tyler lost his sire before learning that the lab needed additional hair to process his DNA, thus the reason he is not registered. There's a lot of potential for this young bull. He has a heap of muscle and bone and a strong top with some extra spring of rib.

100K: Profile On File | SNP: Sire Verified | HP: Homo Polled

This stout made bull goes back to the renowned Sparrows Braxton and Circle Cee Bluesky. His sire was lot 1 in the Stepler Farms 2019 Bull Sale. He's one that has impressed us all the way from a calf with his big rib and hind 1/4. The amount of power he brings to the table while maintaining a smooth look is something we really admire, plus he's out of one of our matriarchs.

This bull is perhaps one of the most impressive individuals that we have on offer this year. This high-performance bull is out of a female that we've been really impressed with and has a nice heifer calf this year showing consistency in the bloodlines. This bull is exceptional in his foot and leg structure and reads with so much red muscle, power, and volume while still being attractive and smooth made that we can't help but think he's a real deal opportunity.

This bull crosses the Tank 7E herd sire with a solid daughter of the great Ledger bull. 56J is a nice sized breeding tool with a lot of hip and muscle from front to back. One thing that we think is exceptional about this bull is his foot and leg structure all the way into the top of his shoulder and neck. A solid individual you aren't going to want to cross out in the catalogue.

FISCHER CHAROLAIS BULLS

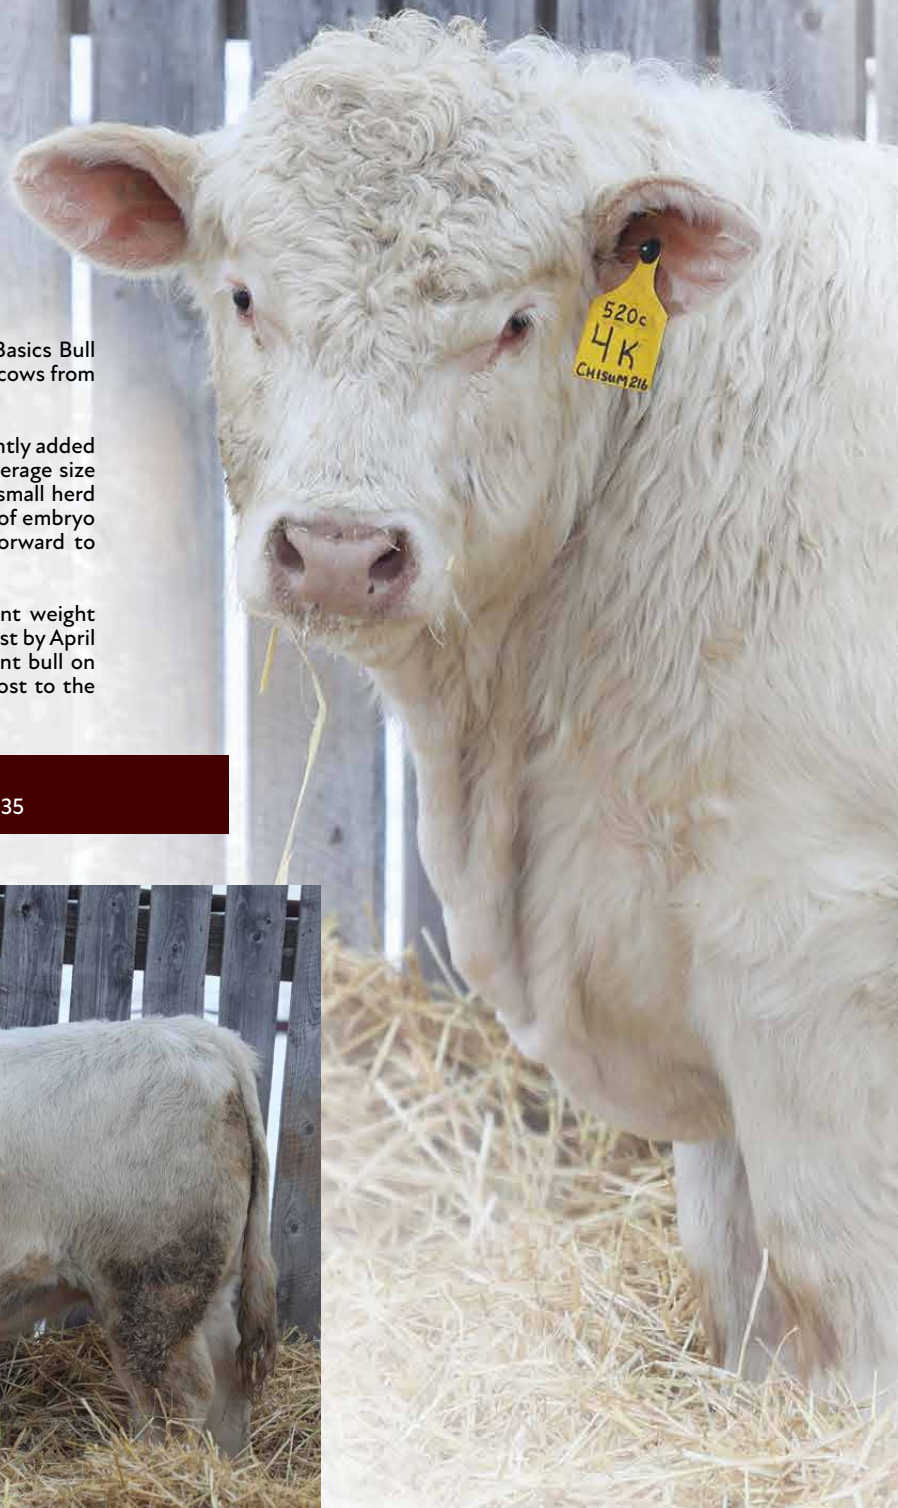

Fischer Charolais is very pleased to be a part of the Back to the Basics Bull Sale. Thank you to the Trefiak's for their confidence in selecting 50 cows from us to begin their path into the Charolais breed.

Our farm is located just east of Irma, and Tyler's family has just recently added the sixth Fischer generation to the Irma community. We are an average size grain farm, and a cow/calf backgrounding operation, along with a small herd of Purebred cows. This year we are excited to have our first group of embryo calves for sale, as we strive to produce quality bulls. We look forward to bringing a quality offering to the sale in the years to come.

Our bulls in this sale will be scrotal measured and have a current weight available near sale time. They are guaranteed to pass their semen test by April 1, or the buyer will be refunded his deposit or select a replacement bull on their choice. We will keep the bulls on feed until April 15, at no cost to the buyer, and provide delivery.

Brent and Beret Fischer

Rocky is one of our favorite herd sires of all time and was crowned the "Hereford of the World" Champion in 2019. A bull that is surprisingly capable of so much calving ease with 85 to 90lbs birth weights and extra power and performance. You will note that his offspring are quick to gain and have additional fleshing ability that we love as an influence in the cow herd and the bull pen. We have some highly productive and excellent uddered daughters that we think will only add to the story of Rocky's legendary career.

Everyone here knows "Hanson" as our current leading Sr. Hereford sire who we purchased from Sherri Hanson in South Dakota. He is one of the cleanest footed Hereford bulls we have seen and he passes it on to his sons and daughters, they are all near perfect "at the ground" which is extremely important to us around here. You will note a consistency in the look of his offspring with most having great pigment and bare necked. The first daughters in production look terrific and weaned some heavy calves last fall and you can just tell they will be sticking around here for a long time.

Endure is probably one of the most widely used sires around the globe and for good reason. They are attractive cattle with a highly consistent "stamp" to his progeny that have added muscle and growth without adding excessive frame. He comes from the very successful NJW program that consistently breeds functional cattle with a highly maternal influence. You will like the extra pounds in your steers and love the replacement daughters.

This bulls dam is out of a cow we sold in our dispersal and bought back awhile ago. She's the mother of Casey's great Marigold cow, and this R117 cross has been one we liked too. 729J is one of few horned bulls in the sale this year but he's a big-ribbed bull with a whole lot of bone and performance in him. You'll love the muscle and hip on this guy.

768J goes back to our great 9Z donor cow, this female is Rocky's sister and has done nothing but produce around here. This female has done the exact same with this bull here, he's well pigmented and longer spined with a square hip and solid foot. He's also dark red with a presence that will catch your eye no questions asked.

URUGUAY HEREFORD BULLS - CABAÑA LAS ANITAS

LAS ANITAS
Los toros de Alfonso

The 'Uruguay Bulls' will have a revenue sharing semen interest retained by MJT Cattle Company and Las Anitas Herefords. Terms will be announced sale week.

How far is one willing to go looking for something unique to add to the herd? It turns out, to the other end of the earth.

We have made many miles looking for animals that 'check the boxes' to add value to our program for our customers. We have strict criteria, and don't always find what we are looking for. New genetics must originate from a generationally maternal focused herd, with cattle that have to work for a living. In addition to being attractive, they must be built right, move well, and offer an outcross to what we can access at home.

In late 2018, Las Anitas was offering a 'Pick of the Herd Flush' in the International Designer Genes online sale. In researching their program, they were having successes both in and out of the ring, and their females had a lot to offer. The only catch, just a short 27 hour trip to tour cows!

Uruguay is a country with only 3 million people, and 12 million head of cattle. Beef is their primary industry. Located in Durazno, Uruguay, Las Anitas is a family Hereford Seedstock operation that is currently operated by two brothers, Fernando and Pepe Alfonso. In addition to a commercial Hereford operation and successful genetics company (Urugen), they raise and sell 100 seedstock Hereford bulls in their own sale each year.

We toured Uruguay for 12 days, a welcome addition to the business at hand of selecting our breeding choices from Las Anitas. We were able to align our travel dates with the World Angus Forum which provided the opportunity to visit some incredible Angus ranches and make some wonderful new friends. The hospitality we were shown every direction we went was First Class. After the Angus tour, Fernando hosted us not only at their own establishment, but generously

spent 3 extra days touring us to many other respected Hereford breeders in Uruguay. We are very appreciative of the time he and his family took to help ensure our experience was the best it could be.

When we toured Cabaña Las Anitas, it was clear that we had made the right choice. We found the cattle to be sound, have great muscle expression, built and marked right, have remarkable hair coats, and most importantly, the females in the purebred program were exceptional. We struggled to select 'the pick' of the females, and the only logical solution was to add additional flushes to our import plan. 3 years later are we ever glad that we did. In addition to this years offering, we have some additional outcrosses in the yearling pens that show excellent potential. We feel that they offer a valuable breeding tool to those looking to add value to their replacement females.

Right here is an extremely rare genetic opportunity. We've been working closely with Cabanas Las Anitas in Uruguay to source some of the strongest outcross genetics for our Hereford program. This here is a product of that partnership. These flush mates are full siblings to the Uruguayan National Champion El Padre. Like his full sibling 717J is a high power, heavy muscled bull with a lot of length of spine, out of a powerhouse female with a nice youthful udder who has won several awards in South America.

This is a bull with superstar genetic backing. His dam is the legendary Erica 74A cow from the Bar-E-L herd and his sire is our own Impressive 813F herd sire. This bull shows how well these two high quality animals cross. He's got such good fundamentals in terms of his foot and legs and combines it with a unique amount of thickness and muscle, all while maintaining a presence that makes him fun to look at. Not too many will miss this guy.

538J is out of a cow we know we can count on to raise a good one and look good doing it, her last bull made a lot of friends and netted in the higher end of the sale. This years bull out of 152B has a great foot under him and is exceptionally deep and long bodied with a lot of extra muscle throughout. He is a performance-oriented bull with an extremely strong maternal backing.

Parent Verified

The mama cow to this bull is an exceptional breeding piece that doesn't disappoint. See her in person and you will agree that you would want a 100 like her. 540J is a bull with a lot of top and muscle and is framed about in the middle for a real efficient and stout package that we really like in terms of his overall balance. Consistent genetics here.
